

# FARMING EQUIPMENT

## PLUMIHOOD

- Dosage is controlled by the size nozzle to be used.
- The patented disc design allows 35cm-width for controlled spraying between plants and crops.
- The sprayer is powered by 2 alkaline batteries that should last up to 45 hours.
- It weighs 1.05kg and is comfortable to use, and avoids carrying water and heavy knapsacks.
- Saves money by not wasting refilling time, accidental drops or dosage mistakes.
- Pure application of herbicide increases the efficiency of the herbicide, and accelerates the visual signs of the application.
