

AGRO-CHEMICALS SEEDLING PRODUCTS

Product	Reg. No. Act 36 of 1947	Composition in %							Composition in mg/kg					
		N	P	K	Ca	Mg	Na	S	Fe	Mn	Zn	Cu	B	Mo
HYGROFERT	K5269	A specially formulated fertiliser for use on seedlings												
		15.3	6.9	18.3	-	1.1	-	1.4	1885.0	449.0	224.0	34.0	561.0	56.0
KIC-START	K5442	A specially formulated fertiliser for root stimulation of seedlings. Contains 3.9 mg/kg auxins.												
		17.2	7.1	2.3	0.8	0.2	-	-	785.0	398.0	398.0	398.0	204.0	6.6
SEEDLING TRAYS	N/A	A wide variety of quality seedling trays are available. It is made from durable material and specifically designed to suit any type of seedling, be it vegetables, flowers or trees.												
STYRO-SEAL	N/A	A polymer coating containing a root inhibiting ingredient which increases the lifespan of the seed tray and prevents roots from penetrating the styrene												
GROWING MEDIA														
HYGROMIX		A high quality Canadian peat based growing medium for seedlings. Some additional vermiculite ensures additional air fill capacity and water holding capacity. A high quality nutrient supplement with the correct macro- and micro-nutrients ensures healthy growth of seedlings.												
HYGROMIX-T		The standard Hygromix growing medium, but with added T-Gro (<i>Trichoderma Harzianum</i> DB 103) (Reg. No. L7456 Act 36 of 1947) for root development and the suppression of certain pathogenic bacteria.												
HYGROMIX BIO-CHARGE		The standard Hygromix-T growing medium, but with added organisms for the suppression of certain pathogenic fungi and fungus gnat larvae.												
PEAT MOSS		High quality Canadian peat moss - 98% organic - Absorbs 20 times its weight in moisture - Free of weeds, insects & Fungi - Odourless												
VERMICULITE		High Quality - Helps reduce evaporation - Reduces algae growth - Better aeration
