

Early Purple Top

Early Purple Top | Turnip | Garden

Purple Turnip tops are the **root tubers of the turnip plant**. The exposed turnip above the soil line during the growing process will be a bright purple colour as its name suggest while the part that remains underground will be white. When harvested the turnips have a smooth skin and about 7 to 10 centimetres in diameter.

Specifications:

Cultivation:	Open-field Fresh Market Processing
Type:	Bunching
Days to maturity:	55 – 85 days
Bulb shape:	Dome
