

Moss Curled

Moss Curled | Parsley

Petroselinum crispum 'Moss Curled' (Parsley) is a bushy biennial forming a dense rosette of rich green, deeply cut, tightly curled, aromatic leaves. The plant will bloom in the second year by sending up stalks bearing small yellow-green flowers in umbels. Unfortunately, the leaves become coarser in the second year and lose their good flavour.

Specifications:

Cultivation: Open field | Under protection
Type: Pre-packer | Bunching | Loose
