

POTASPRAY

Nitrogen / Stikstof (N)59 g/kg
Phosphorus / Fosfor (P)179 g/kg
Potassium / Kalium (K) 299 g/kg

FERTILIZER GRP 1 MISSTOF

Reg. No. / Nr. K2247

Act No. / Wet Nr. 36 of/van 1947

DIRECTIONS FOR USE

Dissolve 2.5-5kg **POTASPRAY** in 50-600L of water and apply as a full cover spray on vegetables, flowers and agricultural crops with high potash requirements in the later stage of growth such as tomatoes, potatoes, cotton, tobacco, citrus etc.

Apply 2.5-5kg per hectare every 10-14days, starting two weeks after flowering.

POPTASPRAY may be mixed with wettable powders, fungicides and pesticides, except those containing copper and sulphur or alkaline materials

Use a suitable sticker-spreader such as Nu-Film P® (L2980, Act 36/1947) or Nu-Film 17® (L2981, Act 36/1947).

GEBRUIKSAANWYSINGS

Los 2.5-5kg **POTASPRAY** op in 50-600L water en dien toe in die laat groeistadium as 'n volle bedekking blaarbespuiting op groente, blomme an landbougewasse met hoë potasvereistes soos tamaties, aartappels, Katoen, Tabak, sitrus ens.

Dien 2.5-5kg per hektaar toe, elke 10-14 dae vanaf twee weke na blomstadium.

POTASPRAY is mengbaar met benatbare poeiers, wam- en insekdoders, behalwe die wat koper, swael of alkalise middels bevat..

Gebruik saam met 'n geskikte kleef- en verspreidingsmiddel soos Nu-Film P® (L2980, Wet 36/1947) of Nu-Film 17® (L2981, Wet 36/1947)
