

## Red Lady

### Red Lady | Papaya

The fruit of the Red Lady variety of papaya do not rot up to 15 days after complete ripeness. That in turn proves helpful in export of these fruits to any other state or country. Fruiting – 4.5 months and 8 months to pluck the fruit from the plant. Production – 40 to 60 kilograms per plant. Optimum temp – 25 to 30 degrees Celsius. Do not grow any other crop with papaya. About 15 to 20 cm tall seedlings are chosen for planting in 2 months. Red Lady is a vigorous and semi – early, productive cultivar and showed good tolerance to papaya ringspot virus. Papaya roots are very sensitive to water logging or standing water. Plants begin to bear fruits at 80 cm height. Average 30 fruits per plant in first 15 to 18 months. Fruit weight about 1.5 to 2 kgs. Fruit is very delicious in taste and fleshy.
