

Santorini

Santorini | Coriander

Coriander 'Santorini' is considered a **selection form Santo benchmark in the coriander lines**. It is probably the best variety of coriander for leaf production as the plant combines very slow bolting with an upright habit and excellent flavour. The upright habit makes harvesting easy.

Specifications:

Cultivation:	Open field Under protection
Type:	Pre-packer Bunching
Days to maturity:	15 – 25 days Micro 45 – 55 days full grown
